Macomb County Health Department

Bioterrorism Emergency Preparedness

Bioterrorism/Emergency Preparedness

The Macomb County Health Department has received funding from the Centers for Disease Control and Prevention (CDC) for the past three years to plan for a public health response to a biological, chemical, or radiological terrorism event. Planning activities have been coordinated with surrounding County Health Departments, area hospitals, County Emergency management departments, and other community partners.

Bioterrorism/Emergency Preparedness

- ◆ Development of mass vaccination and medication dispensing plans for biological agents such as smallpox and anthrax.
- ◆ Development of expanded surveillance capabilities for the detection of a terrorism agent.
- ◆ Development of plans for the management of mass casualties and fatalities.
- ◆ Participation in table top and full scale emergency exercises with area hospitals, Selfridge Air National Guard Base, and other community partners.
- ◆ Training of department staff for alternatives roles should a response for a terrorism event be necessary.
